Telugu

# PROJECTS

---

## Amazon Electronic Sales Data Analysis

This project is based on descriptive analysis, aiming to analyze sales data to:

- Identify best-selling and least-selling products
  - Categorize sales based on product performance
  - Understand sales trends to support data-driven decision-making
- 

## Blood Bank and Donation Management System

- Designed and implemented a web-based application to manage blood bank operations
  - Developed functionalities for donor registration, appointment scheduling, and blood inventory tracking
  - Automated blood request processing and allocation to streamline operations
  - Enhanced user interface and data management for improved communication among donors, medical staff, and administrators
- 

## Call Centre Employee Performance Analysis

- Conducted a three-month analysis of call center performance using Power BI
- Developed interactive dashboards with slicers to filter by agent, topic, and date, and incorporated gauge and doughnut charts for key metrics
- Visualized call volume trends and month-wise answered call percentages with stacked column charts
- Compiled comprehensive agent statistics in a matrix visualization for performance insights
